

End-of-Year deals on Enzo Life Science!

Experience precise analysis with ENZO [high-sensitivity cytokine ELISA kits](#)
- designed to unravel the intricacies of immune modulation

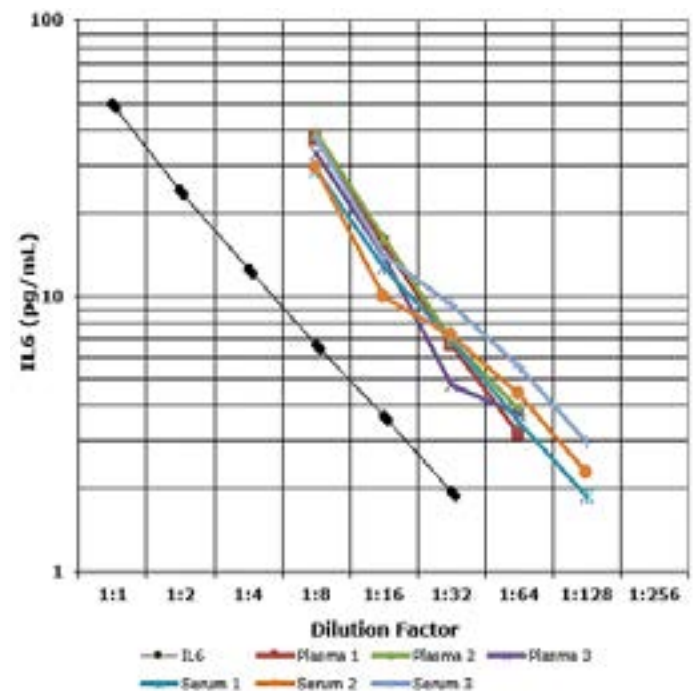

Save 20% on selected ELISA kits from Enzo to quantify biomarkers of inflammation!

Cytokine release syndrome (CRS), a multifaceted immune phenomenon driven by dysregulated pro-inflammatory cytokine release, lies at the core of scientific inquiry.

Within CRS, interleukin-6 (IL-6) emerges as a pivotal biomarker, shedding light on immune response dynamics and inflammation regulation.

Enzo Life Science flagship [IL-6 \(human\) high-sensitivity ELISA kit](#) empowers researchers to quantitate IL-6 levels, even at the lowest concentrations.

By capturing the nuanced dynamics of IL-6 release, this kit facilitates a deeper understanding of immune responses in CRS.

The IL-6 (human), high sensitivity ELISA kit is a colorimetric immunoassay kit with results in 3 hours. Absorbance is read at 450 nm. Measure up to 40 samples in duplicate per 96 well kit.

[Infrared light therapy relieves TLR-4 dependent hyper-inflammation of the type induced by COVID-19](#)

Blanche Aguida et. al

ENZO [IL-6 ELISA kit](#) enabled researchers to directly quantify the dramatic anti-inflammatory effect of infrared light on a key COVID-19 cytokine. This strengthens the case for further clinical evaluation of this promising therapy and invites researchers to investigate further.

End-of-Year deals on Enzo Life Science!

ENZO Life Sciences offers a wide selection of cost effective, reliable kits compatible with a large variety of ELISA assays

A short description of some of the kits:

IL-6 (human), High Sensitivity ELISA Kit

- Most-sensitive (0.057 pg/mL) colorimetric kit for IL-6 quantification
- Easy-to-use liquid colorcoded reagents reduce errors
- Rapid quantitative results in 3 hours
- High-throughput immunoassay measures up to 40 samples in duplicate per 96-well kit

Histamine ELISA Kit

- Highly sensitive measurement, detecting as little as 0.068 ng/mL
- Unique assay which does not require an additional acylation step
- Rapid results in 2.5 hours for up to 40 samples in duplicate

LTB4 ELISA Kit

- Ultrasensitive measurement of LTB4, detecting as little as 5.63 pg/ml
- Broad dynamic range suitable for a large variety of samples
- High throughput format with results in 4 hours for up to 39 samples in duplicate

Cat. No.	Product Description
ENZ-KIT140A-0001	Histamine ELISA Kit
ENZ-KIT178	IL-6 (human), high sensitivity ELISA Kit
ADI-900-036	IL-10 (human), ELISA Kit
ADI-900-001	PGE2 ELISA Kit
ADI-900-068	LTB4 ELISA Kit
ADI-900-156A	IL-8 (human) ELISA Kit
ADI-930-001	PGE2 high sensitivity ELISA Kit
ADI-900-097	Corticosterone ELISA Kit (96 wells)
ADI-901-097	Corticosterone ELISA Kit (5x96 wells)
ADI-900-071	Cortisol ELISA Kit (96 wells)
ADI-901-071	Cortisol ELISA Kit (5x96 wells)
ADI-900-045	IL-6 (ms), ELISA Kit

This offer is valid until November 30, 2023.
