AH diagnostics

Celebrating 40 years of pathology innovation

Bad morphology – poor staining – tissue that falls of – are these some of the things you are struggling with in your lab?
Not any more, let us help. Below, you will find small instruments and reagents that help you easy your work and give you strong and crisp staining, no matter if you do H&E, IHC, Special stains or IF.

Essentials for the preanalytic workflow

Klessidra
Safe formaldehyde fixation.

Bio-Optica

Intended for the fixation and transport of histological samples. The patented, closed-circuit safety device, prevents contact between formaldehyde and the user.

Free sample of 90mL and 160mL jars

Heating-, cryoplates and waterbaths
Different options available

Reliable temperature management for sample processing and preservation. Engineered to deliver consistent results.

Campaign prices from:
9.298 NOK

On-demand and batch cassette
UV-laser printers
Different options available

High speed prints
Up to 6 hoppers
For cassettes with and without lids

On-demand and batch slide
UV-laser printers
Different options available

High speed prints
Small footprint
Up to 200 slide input

Molds for tissue embedding
Different options available

Bio-Optica

Different measures steel molds for embedding of histological paraffin samples

Campaign prices from:
189.338 NOK

We can help you choose the right solution

Innovative products for the analytic workflow

DeWaxAR
RIC02-001

NOVODIAX

Save 20%

Are you still dewaxing and doing pretreatment in the microwave? Make it easy, more consistent and standardized by using this small HIER system.

Campaign price:
77.203 NOK

Manual staining solutions
Different options available

Bio-Optica

Save 15%

Make your IHC or special staining easier to handle. Easy and economical systems for histological and cytological staining.

Campaign prices from:
1.214 NOK

More than 70 different ready to use special stains

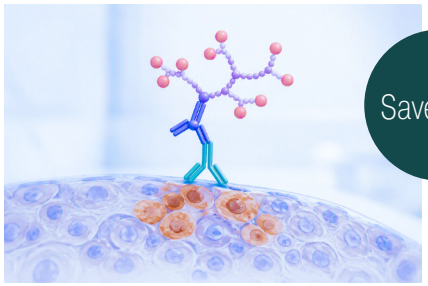

Save 15%

IVDR approved special stains and tissue dyes. Differnt options available.

Campaign prices from:
166 NOK

Two-step detection system
If you want the best, but won't pay the rest

ZYTOMICS

Save 15%

These highly sensitive polymer detection ssytems makes your IHC work simpler, faster, more consistently and improve your signal to noise ratio.

Campaign prices from:
1.778 NOK

Certified service that meet your needs - a quick call away

Fast response time
With one point of contact at AH diagnostics, booking a visit is easy. We respond to your inquiry within 48 hours.

Service
A Field Service Engineer will perform the validation of your PCR thermocycler right in your lab, so you experience the least amount of down-time.

Service report
Following the service visit, you will receive a comprehensive report containing all measurement data.

post analytic workflow

Is this the look of your office after a long week in the lab – no need to worry – we have solutions for both your slides and cassettes.

Archiving systems for every need
Differnt options available

Campaign prices from:
48 NOK

40 Years
Your Science, Our Focus

AH Diagnostics marks 40 years of supporting and advancing pathology and immunohistochemistry. Throughout this journey, our mission has remained constant: to deliver instruments and solutions that enhance workflows, improve accuracy, and strengthen scientific outcomes, backed by qualified specialists dedicated to supporting our customers every step of the way.

To celebrate this jubilee, we have collected exclusive discounts and some of the essential products you may need in your lab or workflow. If you want help finding the right solution, protocol or just want sparing, reach out to us and we will help you with your project.
